- **Sponsor / Presenter:** Tim Healey (Et Al/Consulting Engineer).

Key points included historical context (Muncie founded in 1865), reduction of overflow volumes since 2011, ongoing state negotiations to target an 8-overflow average year level of control (avoiding an estimated \$550+ million capital burden for zero overflows), key upcoming infrastructure (Kilgore Interceptor, treatment plant capacity expansion to 60 MGD, CSO 22 below-ground storage tank), and tentative scheduling designed to spread capital costs.
